### Detailed Action

#### 35 USC 112, 1<sup>st</sup> Paragraph Rejections

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 91-117 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Applicants have amended claim 91 and presented new claim 112 to recite a viral vector packaging cell line comprising sequences for the non-nucleic acid components of the viral vector wherein said sequences have “[b]een stably integrated in the genome of said cell line and code for **envelope genes** (emphasis added) from two different viruses”.

There is no support for the newly claimed limitation in the application, as filed. Applicants, in the instant application, recite packaging cells that comprise sequences encoding envelope or surface “components” for viral vectors. Throughout the specification applicants refer to packaging cells for producing enveloped viral vectors comprising two components present on the surface or envelope of the vector wherein the components can be from two different viruses but do not explicitly or implicitly

contemplate packaging cells comprising **two different genes encoding two different envelopes from two different viruses**. This is a NEW MATTER rejection.

### **35 USC 112, 2<sup>nd</sup> Paragraph Rejections**

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 91-117 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 91 and 112 (and dependent claims) are vague in that they recite a packaging cell line comprising nucleic acid sequences which have been stably integrated into the genome and “code for envelope genes” from two different viruses. This language is unclear because nucleic acid sequences **code for** polypeptides, not genes.

Any rejection not repeated in this Office Action are withdrawn

No Claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
